

**Name:** Rick  
**Surname:** Hodges  
**Organization:** Natural Resources Institute  
**Address:** University of Greenwich  
**City and** Chatham Maritime  
**City Code:** Kent ME4 4TB  
**Country:** UK  
**Phone:** + 44 1634 883813  
**Fax:** + 44 1634 883706  
**Email:** [R.J.Hodges@gre.ac.uk](mailto:R.J.Hodges@gre.ac.uk)

**Languages:** English (native speaker) working knowledge of French and Indonesian  
**Profession:** Post-harvest entomologist specializing in the management of durable commodities in storage and trade  
**Additional specialization:** Quality assessment of stored grain and advice on remedial action, pest management, loss assessment, grain quality standards, development and delivery of training courses in store and commodity management

**Experience in Post-harvest domain (organizational approach, technology, training, etc):**  
Pest and commodity management of grain at all scales of storage; assessment of, and advice on, commodities moving in trade in ships and in containers; loss assessment of grain in the postharvest system; development of appropriate storage systems and regulations to support inventory credit; research into the larger grain borer as a pest of farm stored maize in Africa; development and delivery of training courses.

**Experience made in (country, region):**  
Long-term experience in West Africa (Mali) and South East Asia (Indonesia), over sixty short-term projects and consultancies in Africa, South Asia and SE Asia for governments and UN agencies.

**Experience as a Post-harvest consultant:**  
Over 30 years experience researching and undertaking consultancies on the protection of stored grain in farms, central storage, on ships and in shipping containers. Services include providing novel solutions to storage problems; assessment of quality and suggestion for remedial action for commercial and food aid shipment; training and advice on the management and protection of stored grain commodities; development and implementation of loss assessment surveys for grain held by subsistence farmers; and, development of bag storage systems appropriate to the needs of warehouse receipts systems in developing countries.

**Services for Post-harvest consultancies offered:**  
Assessment of problems with grain in storage and moving in trade in ships and containers and advice on remedial action; research on pest and grain quality problems in farms and central storage; advice on grades and standards; advice on pest management; development and delivery of training course on all aspects of grain storage and quality management.
